

## Thrust Areas of Research

- Air pollution
- Biodiversity
  
- Bioenergy
- Bioenergy – Microalgae and its applications; Biohydrogen production
- Biomaterials – Bio-nanomaterials; Phytochemistry
- Bioremediation
- Climate change
- Conservation biology
- Disaster Management
- Disaster Risk Reduction
- Eco restoration
- Ecotoxicology
- EIA
- Emerging Contaminants
- Environmental Chemistry
- Environmental education
- Environmental Education & Governance
  
- Environmental management
  
- Environmental Microbiology
- Environmental Pollution
- Forest Management
- Geology
- Geomorphology
- Landscape changes
- Marine Pollution
- Microbial Fuel Cells
- Microplastic
- Natural and Anthropogenic Disasters
- Photochemistry
- Polar Research
- Polar research (Indian Polar Expedition)
- Radiation science
- Remote Sensing and GIS
- Solid Waste Management
- Vermitechnology
- Wastewater Treatment
- Water and Sanitation – Community based water harvesting and sanitation
- Water Pollution Monitoring and Control
- Water Purification Technology
- Wetland Ecology & Biodiversity
